DECLARATION OF CONFORMITY FOR COMPLIANCE WITH THE REACH REGULATION (EC) NO. 1907/2006

Thur Metall produces and trades products that are defined as products under chemicals law. In terms of REACH, Thur Metall is therefore a "downstream user". According to the provisions of the REACH Regulation, we are therefore not subject to any registration obligations. This applies in particular because no chemical substances are released from our products under normal or reasonably foreseeable conditions of use (see Art. 7, Para. 1 of the REACH Regulation).

The chemical substances that may be required to be registered in our products therefore only require registration by our upstream suppliers.

1) Pre-registration and registration

In our own interest and in order to ensure a high level of product safety, we have been closely following the implementation of REACH and the resulting requirements since 2008. **Against this backdrop, we oblige our upstream suppliers to supply only REACH-compliant products.**

2) Obligation to disclose substances in products pursuant to Art. 33 of the REACH Regulation

We are also in contact with our suppliers with regard to the obligation to provide information pursuant to Art. 33. According to Art. 33 of the REACH Regulation, our supplier must inform us if certain substances of very high concern are contained in the product at above 0.1% weight by weight. If we receive such notification from our supplier, we will pass this on to you directly. Of course, this also applies to substances that have been subsequently assessed as hazardous (SVHC).

Please do not hesitate to contact us if you have any questions.

Kind regards,
