

# Overhead cabinets/top-mounted cabinets with roller shutters

Ideally suited as additional storage space for tools, small parts and much more ...

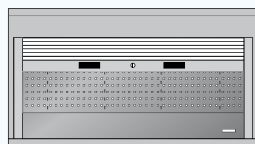

- + Maximum stability**  
Thanks to a high-quality housing design made from robust sheet steel with a load capacity of 25–50 kg when the load is spread evenly.
- + Practical rear panels**  
With a perforated construction comprising a square perforation (10 × 10) with a division (28 mm) as well as vertical slots for attaching accessories easily.
- + Secure locking option**  
A roller shutter made from durable plastic (light grey, similar to RAL 7035) ensures secure locking.
- + Flexible power supply options**  
A double floor provides space for cable management.
- + Fastening material**  
Including for wall installation. Please note that different walls also require different fastening material.

Depth **250** × Height **800** mm
